The scans were done properly. The pages for each document are single-sided. On my end I don't see any indication that the documents didn't go through. Usually, if a pdf doesn't go through I get a message in MS Outlook that the files were rejected usually because of size. I know this because of the hundreds of documents I have send to the Government Accountability Office last year for the Class II audit. What I am going to do is resent the documents as separate files with new names. The file for # 1 below is attached separately.

1. Letter from M. G. Mefferd (State Oil & Gas Supervisor) to Mr. Nathan Lau responding to additional information (dated stamped 03/31/82). Focus on attachment #2

2. Letter from Deputy Attorney General to Mr. Richard E. Reavis (Region IX). Note attachment # 2 "Exempted 1425 Demonstration Aquifers." (date stamped 12/06/82)
3. Action Memo AA recommendation for primacy approval to EPA Administrator.

Hi Bob,

I see my earlier message did not go through. It looks to me like the scans were not done properly and there are ghost pages at every other page. Can you verify we have each page you intended us to have please?>

Michele, this is the first installment of some of the relevant documents for CA DOGG primacy:

1. Letter from M. G. Mefferd (State Oil & Gas Supervisor) to Mr. Nathan Lau responding to additional information (dated stamped 03/31/82). Focus on attachment #2
2. Letter from Deputy Attorney General to Mr. Richard E. Reavis (Region IX). Note attachment # 2 "Exempted 1425 Demonstration Aquifers." (date stamped 12/06/82)
3. Action Memo AA recommendation for primacy approval to EPA Administrator.

There will be additional documents depending on our discussion with HQ management. If these document don't get through let me know as MS Outlook has a limit on size.
